

Berlin, Nov. 1, 1888.

My Dear Mr. Watson: I am expecting
some plants to be sent to me at Cambridge.
If any should come please set them aside
until I come. All our old Carex
puzzles are clearing up nicely. The C. refracta
of Schk. and Willd. about which so much
fuss has been made for almost a century
and which has been without a country, is a
plant which has but comparatively recently
been described from the alps of Piedmont.
And C. juncea of Willd., said to have come
from America, is not an American
plant at all!

I am seeing much that I came to
see, and am therefore enjoying myself. Hope
you are well. Yours &c T. H. Bailey
